- I. **Public Health Emergency**. That this Executive Order shall continue the local disaster declaration and public health emergency for Bexar County for the period specified in this Executive Order and shall incorporate and adopt the most recent executive orders, proclamations or declarations issued by Governor Greg Abbott and any subsequent orders, proclamations or declarations issued by the Governor relating to the COVID-19 disaster. This Executive Order further identifies measures that are necessary to mitigate spread of the COVID-19 virus in Bexar County.

- II. **Health and Safety Policy – Commercial Entities**. All commercial entities in Bexar County providing goods or services directly to the public must continue to post and implement a health and safety policy (“Health and Safety Policy”). The Health and Safety Policy required by this Executive Order should be developed by the commercial entity after considering the specific needs of its business operation and services provided in light of current State orders public health guidance. While the commercial entity should implement the Health and Safety Policy which best fits its business needs in consideration of the specific health risks presented by its operations, commercial entities may consider the following elements to include in their Health and Safety Policy:

- i) Requiring employees, customers and other visitors to wear face masks;
- ii) Requiring customers to maintain six feet of separation;
- iii) Implementing voluntarily developing occupancy limitations; or
- iv) Implementing screening procedures such as temperature checks or health screenings.

Nothing in this Executive Order requires a commercial entity to adopt any specific recommendation. However, all commercial entities must post a Health and Safety Policy once adopted in a conspicuous location sufficient to provide clear notice to all employees, customers and visitors of any health and safety requirements implemented by the commercial entity, including any policy on wearing a face mask.

If an individual is refusing to comply with the entity's Health and Safety Policy, then the commercial entity may call on legally authorized officials to remove any individual refusing to comply with its adopted Health and Safety Policy from its premises in accordance with trespassing laws.

Nursing homes, state supported living centers, assisted living facilities, long-term care facilities and dialysis facilities should follow infection control policies and practices set forth by HHSC, including minimizing the movement of staff between facilities whenever possible. Long-term care facilities and dialysis facilities should follow all additional CDC guidance to take proactive steps to protect the health of residents and preserve the health care workforce by identifying and excluding potentially infected staff members, conducting visitation consistent with the Texas Governor's executive orders, any applicable declaration of the Mayor of San Antonio and any Executive Order of the Bexar County Judge, ensuring early recognition of potentially infected patients, and implementing appropriate infection control measures.

All social distancing measures must be implemented at the above-described control points and while in any Bexar County facility. All contractors, visitors and members of the public are required to wear a face covering in Bexar County buildings, unless the contractor, visitor, or member of the public has a medical condition or disability that prevents wearing a face covering. Bexar County employees are required to wear face coverings in Bexar County buildings wherever it is not feasible to maintain six feet of social distancing from another person or when working in areas that involve close proximity with other coworkers, unless the employee has a medical condition or disability that prevents wearing a face covering.

- VI. **Further Actions as Necessary.** Significant escalation in one or more of the Local Progress and Warning Indicators identified by the COVID-19 Community Response Coalition such as the number of daily cases, the need for case investigators and contact tracers, the number of patients hospitalized, in ICU, or on ventilators due to COVID-19 related complications, the Total Case Double Time, the COVID-19 weekly positivity rate (i.e., the percentage of lab tests that are positive for COVID-19), and the STRAC Health System Score may require the strengthening or addition of mitigation measures.

The San Antonio Metro Health District will work with other community stakeholders to monitor the above criteria which have been identified as key factors to evaluate the effectiveness of control measures to mitigate spread of the COVID-19 virus.

Additionally, State health indicators, including the transmission of COVID-19, and the number of COVID-19-related hospitalizations and fatalities will be monitored and taken into consideration.
